The Importance of Reliable Machinery in the Crushing & Screening Industry

At Eco-Match (Pty) Ltd, we understand that in the mobile crushing and screening industry, performance and reliability are non-negotiable for our clients. That's why we continuously invest in modern, state-of-the-art machinery that enhances our client's production output. This equipment allows us to process material faster, reduce fuel consumption and minimise downtime on site — all whilst still meeting strict safety and compliance standards, to ensure our clients are provided with an excellent service. For our clients, this means more consistent output, better turnaround times, and solutions that are aligned with their project demands.

Spotlight On Quality: Why We Choose McCloskey?

The quality of our service starts with the quality of our equipment — and that's why Eco-Match (Pty) Ltd has proudly added two new McCloskey machines; a J45 Jaw Crusher and an R155 Sclaping Screen, to our existing fleet. Known globally for their durability, performance and cutting-edge design, McCloskey has set the standard in the mobile crushing and screening industry.

We sourced our newly acquired McCloskey equipment through Kanu Equipment (Pty) Ltd, a local supplier whose exceptional service and support have made the acquisition and commissioning process seamless. Their team has been responsive, knowledgeable, and committed to ensuring we get the most from our investment and our clients reap the benefits.

Together, McCloskey and Kanu Equipment (Pty) Ltd help us continue delivering the reliable, results-driven solutions that our clients have come to expect from Eco-Match (Pty) Ltd.

The Eco-Match Team Is Growing

Eco-Match (Pty) Ltd is excited to officially welcome Georgia Abraham to the team as our Operations Manager.

Georgia brings with her a

wealth of experience in business operations, client relationship management and all the moving parts that keep a service, and client focused business running smoothly.

With a strong background in strategic planning and day-to-day execution, she plays a key role in ensuring our projects are delivered efficiently, professionally and with the attention to detail our clients have come to expect.

Her hands-on approach and passion for people and process make her a valuable asset to our team and a key part of our continued growth.

Welcome, Georgia!

For any crushing and screening related enquiries, please feel free to contact Georgia:

Project Focus: OYA Wind Farm - Renewable Energy

Eco-Match (Pty) Ltd is proud to be contributing to the Oya Energy Hybrid Facility — a landmark renewable energy project that integrates solar, wind, and energy storage to deliver reliable and dispatchable clean power.

Situated in the Komsberg Renewable Energy Development Zone, the Oya Project marks a major advancement in South Africa's journey toward energy security and sustainability.

We are working alongside SPEC Africa (Pty) Ltd, providing on-site aggregate crushing services essential to the project's infrastructure development. It's a privilege to play a role in such a transformative development that not only supports a greener future but also showcases the importance of dependable, mobile raw material processing solutions in the renewable energy construction sector.
